

TLED STRIP Series

LED T8 Bypass Lamp Fixture

Applications:

The TLED STRIP series is designed for single and double ended power LED tubes. Intended uses include interior warehouses, commercial, and retail spaces. The optional reflector designs make this fixture suitable for a variety of environments.

Build Details:

22-gauge (0.034") pre-painted high reflective white steel. Numerous knockouts are provided for ease of installation. End caps double as a coupler to join strips from end to end for continuous row mounting.

Mounting:

Surface mount, chain or cable hung.
